

"MOLESKINE", TERRAINS VAGUES

21 medias

En bordure des voies ferrées, les industries désaffectées, les ateliers abandonnés...Traces de l'activité anéantie, empreintes, vestiges, cicatrices, stigmates. Le bruit a disparu .A la place le sifflement du vent, quelques bruits d'insectes, avec en fond plus loin, la rumeur des activités présentes .Terrains vides, vacants, libres, déserts, disponibles...

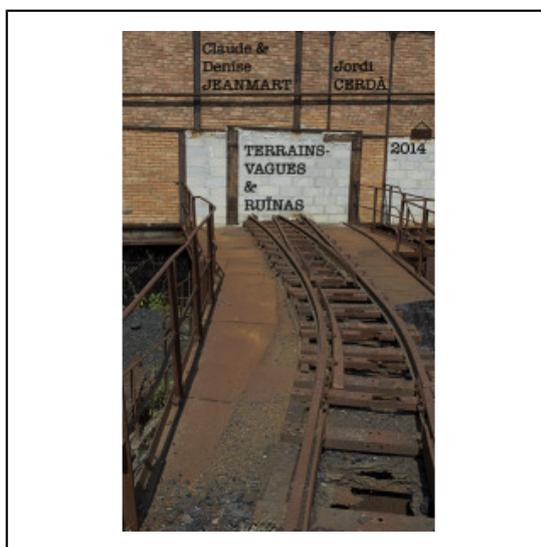

Climat de liberté, de transgression, de possibilité, d'aventure, ...de solitude savourée. Solitude aussi des ruines historiques, traces des confrontations passées, mélancolie devant les ravages du temps, la fragilité des orgueilleuses splendeurs.
