COUPLES-COLONNES EN ECHO – PREMIER.

COUPLES-COLONNES EN ECHO NEURONAL

Pour la réalisation des Couples-Colonnes, j'ai demandé à des amis d'être les partenaires de ce travail, en acceptant d'être photographiés dans des positions qui puissent s'inscrire dans le format d'une colonne, et dans celui d'un chapiteau. De ces photos dont je suis les contours d'une main, pendant que je les dessine de l'autre, sans voir la main qui dessine, j'obtiens des tracés sur papier, avec les aléas, les déformations et les surprises du dessin en aveugle. Ces tracés, je les projette par vidéo- projecteur, l'un après l'autre sur des feuilles de polyester. Le premier dessin projeté, je le travaille plastiquement avant de projeter par superposition un autre dessin choisi parmi les six. Je travaille cette superposition avant d'y adjoindre un 3^e et ainsi de suite . En fait je n'ai utilisé que 3 ou 4 dessins pour chaque couple. Reprenant ces formes, parfois curieusement imbriquées, voir déformées, j'ai réalisé une soixantaine de compositions, sur palette graphique, tirées au format 60 x 40, par imprimante jet d'encre. La série n'est pas close, elle évoluera en fonction des nouveaux Couples-Colonnes à venir.

La mise à jour de Photoshop, comporte l'arrivée de filtres nouveaux, appelés filtres neuronaux, en référence à l'Intelligence Artificielle, dont ils sont issus. Si certains effets peuvent prêter à sourire, justement ceux chargés de donner des expressions aux visages, d'autres ont rapidement permis des modifications plastiques bien venues, surtout celles obtenues à partir des 30 filtres que je viens de créer, en appliquant à mes propres images les possibilités nouvelles de ces filtres « neuronaux » .

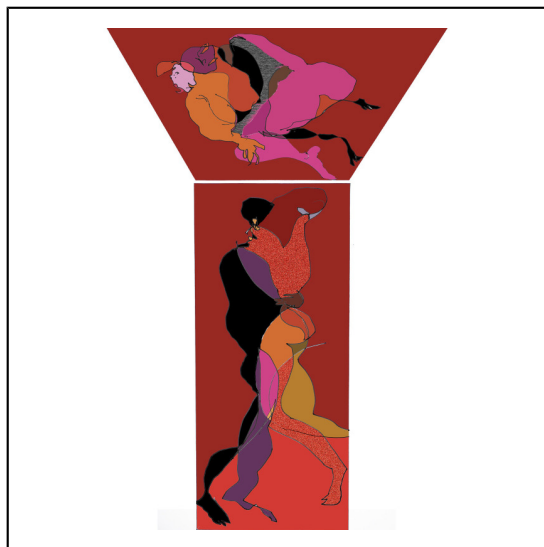

Je présente la totalité de ces images, en commençant par EN ECHO PREMIER

12 - 2022
