BLASON DE L'HIVER

Par monts et par vaux,
De croupes en mamelons,
De corps giron en lignes de crête,
De taillis en chevelure, chaumes et jachères,
De la touffe persistante au port noble et ramifié de l'arbre isolé
Quand l'appel rauque de la corneille
Fend le silence de la terre hivernale sous le ciel, noir, sombre, incandescent
Telle une petite sœur de Proserpine, tranquille, elle confie son corps à la couche
d'herbes sèches et de mousse, et rêve.
